DETAILED ACTION

Election/Restrictions

1. Claims 15-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 4/9/07.

Claim Rejections - 35 USC § 112

2. Claim 2 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 2 recites "an interior surface shaped to direct products within said container towards said cutting member".
3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 2-3 and 9-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. Claim 2 recites "an interior surface shaped to direct products within said container towards said cutting member". It is not clear what shape would provide this affect.

Art Unit: 1761

6. Claims 3 and 9 recite a "low speed, high torque motor". It is not clear what levels of speed and torque would be considered "low" or "high".

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-6 and 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by McLean [Pat. No. 4,199,112].

McLean teaches a device comprising a base (Figure 1, #10), an electric motor (column 2, line 45), a removable container (Figure 1, #18), a cutting member with a slot and cutting edge (Figure 2, #40), a feed vessel (Figure 1, #24), a mixing blade adjoining the inner surface of the container (Figure 1, #20), and a drive shaft (Figure 1, #14). Phrases such as "at a speed between about 1000-1400 rpm" are merely preferred methods of using the claimed apparatus.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1761

10. Claims 7 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over McLean in view of Williams [Pat. No. 4,285,473].

McLean teaches the above mentioned components. McLean does not recite gears.

Williams teaches a food processor comprising a gear assembly (abstract). It would have been obvious to one of ordinary skill in the art to incorporate the gears of Williams into the invention of McLean since both are directed to food processors, since McLean already recited using any suitable link between the motor and drive shaft (column 2, line 48), and since the gear assembly of Williams was an effective means for controlling a food process blade (column 2, lines 12-31).

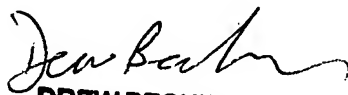

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brady et al [Pat. No. 6,748,853], Starr et al [Pat. No. 6,814,323], Madan [Pat. No. 4,256,265], Cristante [Pat. No. 4,551,026], Unteregger [Pat. No. 6,986,476], Van Guilder [Pat. No. 2,728,368], Cavalli [Pat. No. 4,392,361], Herbert [Pat. No. 4,681,030], Reese et al [Pat. No. 5,619,901], Karkos Jr [Pat. No. 6,216,968], Navedo et al [Pat. No. 6,959,562], and Wulf et al [Pat. No. 6,609,821] teach food mixing and slicing devices.
